

We Continuously Work Towards Promoting Green & Sustainable Technology To Upgrade Existing STP/New STP's

Our Technology Benefit :

- ★ Ensures 30% savings on capital investment
- ★ 85% savings on operation cost
- ★ Runs without electricity and no manpower to operate the plant
- ★ Installation in 48 hours and gives treated water sample
- ★ Meets Stringent norms of the pollution control board

Suitable For: Hospitals, Villas, Gate Community Apartments & Commercial Buildings.

Bio-sewage Treatment Plant (BIO-STP)

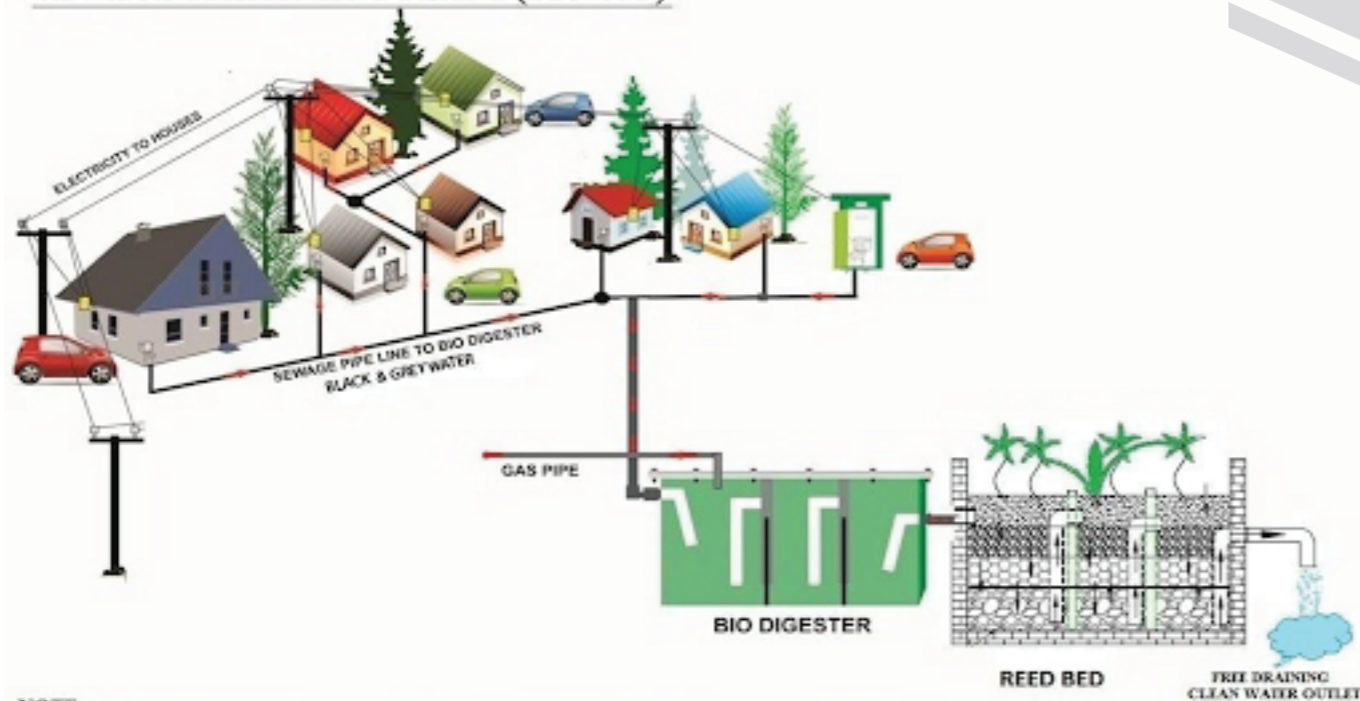

Technology behind Bio-STPs & Features

- This technology is suitable for any area and application in India.
- The process under this technology culminates into treated effluent which is free from pathogens and is also environmentally acceptable.
- No operational cost & maintenance charges

The technology has major three components.

- Low temp ative in ocolums/AMI.
 - Bio-Digesters.
 - Reed-Bed
- Saves and Conserves**
- Water, Energy, Space, Environment reed Bed & Promotes Hygiene.

SEWAGE TREATMENT PLANT (BIO-STP)

NOTE :-
BLACK WATER = SEWAGE WATER FROM COMMUNITY / INDIVIDUAL TOILETS.
GREY WATER = WASTE WATER FROM MULTIPLEXES / HOUSING COLONIES / INDIVIDUAL HAUSES

'Sanitation is more important than political independence'

... Mahatma Gandhi

Gandhi, who wanted to make sanitation a priority for India more than a century ago.

ZERO POWER, ZERO ODOUR AND ZERO CHEMICALS

IMAGINE A WORLD OF CLEAN WATER.
WATER IS GOLD!
TOGETHER
LET'S CONVERT
OUR
SEWAGE TO GOLD.

SOFTENER

Rishi Envirotech is a growing company with the single objective to promote new technologies and better work practices in Water and Waste Water Treatment Solutions. We are deeply drowned in Water & Waste Water and served major sectors like industrial, Residential, Commercial, Hotel, Hospital & many more with proven technologies.

Rishi Envirotech is Hyderabad based company established in the field of Water & Waste Water Treatment Solutions in design, detailing, supply, export, installation & commissioning . We are having the capability to execute Sewage Treatment Plants from capacity 100KLD to 25MLD .

We assure with high quality products @ service with timely delivery. We assure you the highest professionalism and the Best support in all your work.

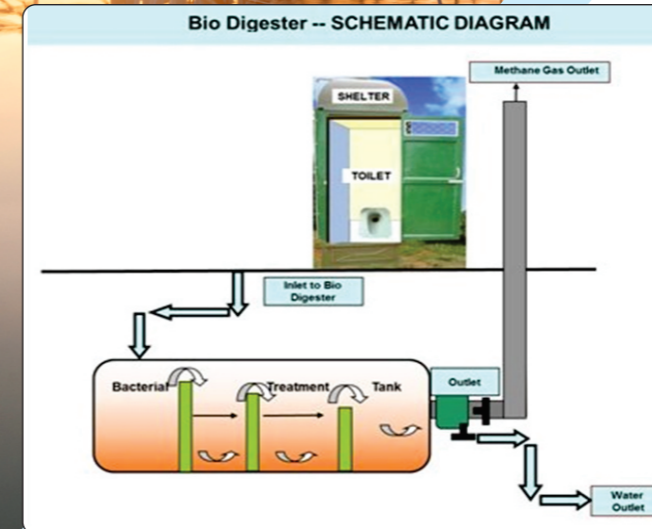

Please keep us posted for your requirement in Water & Waste Water Treatment Solutions...

SEWAGE TREATMENT PLANT

PACKAGED STP

Advantages

- Maintenance free
- No clogging of digester
- Effluent water recyclable
- Pathogen reduction: > 99%
- Minimizes water consumption
- Customized & easily adoptable
- Organic waste Reduction: > 99%
- No need of removal of solid waste
- Faecal matter is digested in the tank
- Environment-friendly & cost-effective
- Suitable for any geo-climatic condition
- No bad smell in toilets from the tanks
- No infestation of cockroaches & flies
- No requirement of adding bacteria/ enzyme
- Effluent is free from off odour and solid waste

Reed Bed
